

Comparison Worksheet

Comparing Graduate Medical Education (GME) as provided at an Academic Medical Center to a traditional Elementary or High School is not a difficult activity, as GME is part of the education continuum, however, a different set of vocabulary and a listing of acronyms is needed. This worksheet has been developed to provide a framework for new University of Louisville (UofL) School of Medicine (SOM) Program Administrators/Coordinators (PACs) to synthesize new information.

The information below is University of Louisville School of Medicine specific and has been filled in where consistency exists. Areas in gray may or may not apply to a particular GME Training Program.
